

- **The art of painting on a selected wooden surface using burnishing techniques.**
- **This is commonly known as Pyrography / Wood burn art**
- **Most of the paintings we present are based on photographs we have taken ourselves.**
- **The specialty of these paintings is that they are created freehand without the use of laser equipment.**
- **Although we tried to make another creation similar to this creation in all respects, this is a unique creation because it was made by free hand**
- **In this way, you will receive a proud creation of a designer who has achieved the highest standards to be achieved by an artist practicing in Sri Lanka.**
